The Sanicondens Best is a pump used to neutralize and pump condensate from condensing boilers, HVAC systems, water heater systems, etc. The Sanicondens Best will pump condensate waste up to 15 feet in height and/or 150 feet away from a soil stack.

- Discharges the condensate waste through a 3/8” vinyl tube. A non-return valve is included on the discharge connection provided with the system.
- Comes with provisions for a ready-to-wire connection to an external overflow switch that will shut down the appliance or alert the consumer in the event of overflow. It also includes all necessary hardware for ease of installation; 20 Ft of vinyl tubing, inlet adapter, discharge adapter.
- Discharges condensate from a condensing boiler or other condensate producing fixtures. The condensate will drain into the system via four 1” inlets located on top of the enclosure.
- Comes equipped with a built-in neutralizer to raise pH levels for harsh HVAC applications. Neutralizing granules come included with the condensate pump. Will neutralize condensate from appliances up to 240,000 BTU/hour input.

Neutralizing agent (Part# 042) is used to raise the pH level from condensate being produced by condensing boilers, air conditioners, etc. The two quart capacity condensate pump comes equipped with all the necessary hardware for easy installation. It can be installed on top of flat surface or mounted on a wall.
